-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments filed on September 3rd, 2004, with respect to Affidavit under 37 CFR 1.132 have been fully considered and is persuasive. The previous office action has been withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 5, 6, 8, 9, 10, 11, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schmidt et al. US Pub. No. 2002/0026935 in view of Armer et al. US Patent No. 6,095,141, and further in view of Berg et al. US Patent No. 6,435,176. Schmidt discloses a canister holding portion (housing), chamber and end cap that are made of polypropylene but fails to disclose a chamber that is made from polyamide that comprises two frustoconical members assembled together coaxially at divergent ends, the inlet and outlet being respectively at opposed ends.

Armer discloses methods and apparatus for delivering aerosolized medication that provides a housing that is formed of polyamide (see column 9 lines 20-25) and Berg discloses a spacer for use with a metered dose inhaler that provides a chamber that comprises two frustoconical members that is assembled together coaxially at divergent ends, the inlet and outlet being respectively at opposed ends. Therefore it would have been obvious to modify Schmidt's

Art Unit: 3743

invention by providing aerosol medicament reservoir (housing) and chamber that are made of polyamide as provided in Armer's reference and to provide a chamber that comprises two frustoconical members that are assembled together coaxially at divergent ends, the inlet and outlet being respectively at opposed ends as provided in Berg's reference in order to obtain great results and prevent leakage.

Allowable Subject Matter

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
